Gesellschaft für Marine- und  
Industrierausstattung mbH

„If you don't keep up with the  
times you will be left behind!“

GMC - always one step ahead

„GMC – round the clock at  
your disposal!“

# PREAMBLE

**Frank Weiher (Manager)**

My most important personal concern is the continued development of the market and our products. The quality management of GMC has always been in effective operation.

Since many years customers from all over the world trust in GMC. And for this to remain like that we are always supplying the most actual technical products of highest quality and share the advantage of progress with you.

Kind regards

# THE COMPANY

Since decades we provide our worldwide customers in the division of shipbuilding, agricultural engineering and industrial facilities (order: ocean going vessels, agricultural and industrial equipment) with consulting and spare parts services.

Our trained service team is taking care of our customers according to their individual requirement.

Over the years we have built up a considerable /large/extensive spare parts warehouse with several thousand items. From here we supply our customers everyday on short term with the required items.

Since 2006 our company is based in Wesseling. Thanks to the favourable logistical position we are perfectly connected to all kinds of traffic routes and are therefore able to deliver all orders on short notice.

# TESTED QUALITY

We attach greatest importance to perfect quality in all our business areas. In order to control and improve our quality standard continually we have established already in 1998 a certified quality management system. Currently our company is certified according to ISO 9001:2008.

Furthermore since June 2012 we are certified as "Known Consignor" according to the directive (EU) Nr. 300/2008 by the LBA (the German "Federal Office of Civil Aeronautics"). This status allows a faster and simplified handling of all air freight shipments.

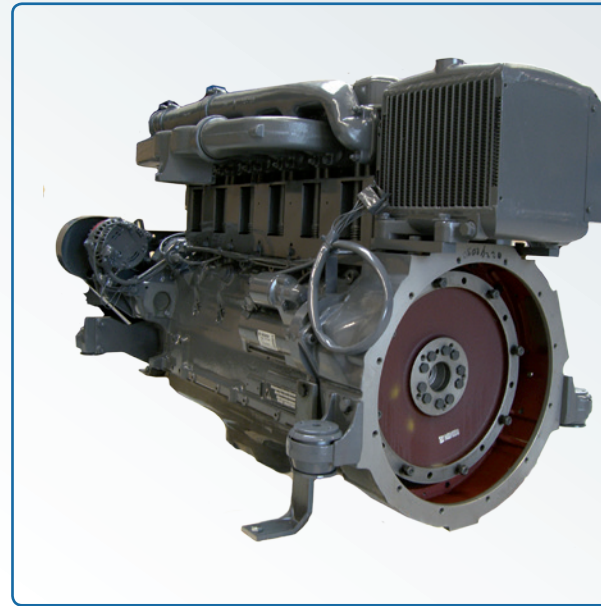

# ENGINES

## Highest quality standards

Basically we supply only spare parts which are satisfying the quality standards of our customers as well as the specification of the engine manufacturer and last but not least which are corresponding to our own quality standards defined through our quality management system. Of course we furnish a guarantee for all products we are supplying as the complete satisfaction of our customers is our ultimate goal.

For most of the engine types we are able to provide the required spare parts from our own stock or procure them on short notice.

We also offer our support for the procurement of complete new engines from the elaboration of the offer up to the final installation.

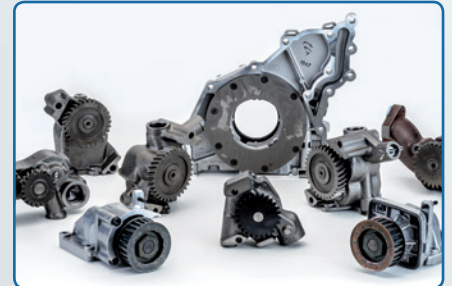

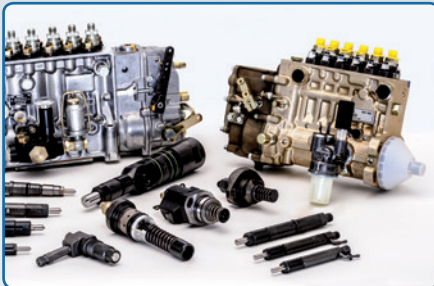

# CONSTRUCTION MACHINES

## Technical progress

Our worldwide customers from construction sites, municipal areas as well as surface and deep mining do appreciate our assistance for procurement and supply of spare parts and components for their construction machines since many years.

# TURBINES AND COOLING PLANTS

## Aftermarket quality from stock

Due to our good contacts to the supply industry as well as to different license manufacturers we are able to supply spare parts for US American diesel and gas turbines in aftermarket quality. Our longtime experience in procurement of these spare parts will help you to plan the repair and reduce the cost of reconditioning and maintenance.

We also are offering to our worldwide customers our best support for maintenance of the engines used for operating the cooling plants as well as for overhaul and replacement of the complete plants.

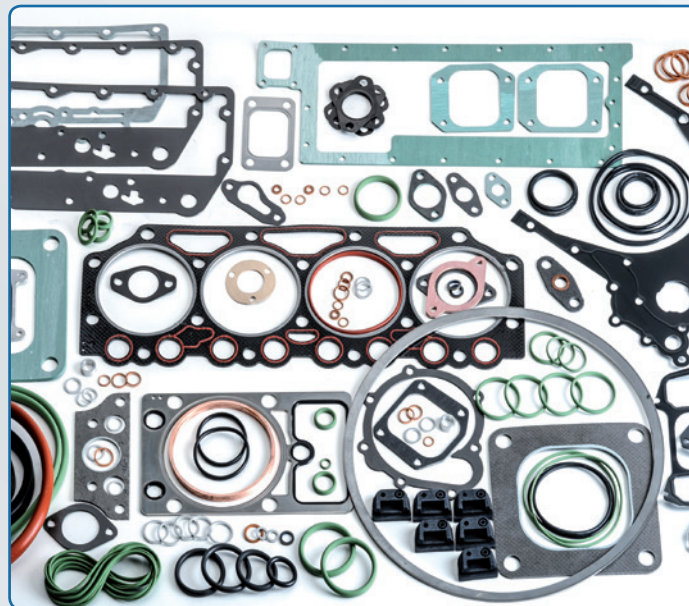

# SHIPS

## High volume of ex-stock items

We are specialized in supplying shipmanagement companies, shipyards, shipowning companies and repair shops in all harbors worldwide. Because of our high volume of ex-stock items we are able to respond quickly to any demand of our customers.

Due to our long term import/export experience we are able to ship your orders fast and safe to any part of the world. The execution of export orders including all necessary export documents is our routine business. Our status as “known consignor” allows us to ship all air freight orders without any delay.

# TRUCKS AND COMMERCIAL VEHICLES

## Safe on the way

As a certified supplier of spare parts with high demand on quality and delivery capacity we have proofed ourselves as a reliable partner for fleets of different commercial vehicles.

According to the needs of our partners we are purchasing and stocking the required components and spare parts also for this range.

Our excellent references go worldwide from North and South America via Near and Far East to North Africa.

# TRACTORS

## Wide range for all current types of tractors

Our spare parts program for tractors is including all current fast-moving items especially

- Front and rear windows, door glasses
- Silencers
- Hydraulic parts
- Gear box parts
- Control parts
- Brakes and accessories

GMC ballast-weights made of ferro reinforced concrete (weight range 400 kg – 2100 kg ) are suitable for front and rear hydraulic-systems category 2 of all current tractor types. Many of our German and foreign customers have already been convinced of the universal applicability for all brands, the functionality and the attractive design.
